

Townsend House Greycoat Place London SW1P 1BL

18/10755/FULL

This scheme is very much better than the previous two proposals. The absence of the rooftop residential element makes a great difference to the coherence of the design. The proposed building will sit beside 10 Rochester Row far more happily.

We are disappointed that the designers have not been able to 'celebrate' the corner of the building that faces Victoria Street in any other way than a widened bay width.
