11 Little College Street London SW1P 3SH (24/04546/FULL) 9th Jul 2024

The Thorney Island Society is concerned that this quiet and largely residential street would be adversely affected by the conversion of No 11 into an embassy. Housing is in short supply, even at the top end of the market – the loss of such housing has a negative effect on the housing supply further down the ladder.

We accept that the expected number of visitors per day is low, but we are concerned that the building could be transferred to another country which attracted more visitors. The street could not accommodate queueing on the pavement.

We note that staff and visitors are expected to use public transport. We assume that no parking permits would be given for any embassy vehicles.
