St John's Concert Hall Smith Square London SW1P 3HA (25/04920/FULL) 6 August 2025

We support this application to undertake this urgently needed work, needed both internally and externally. We consider that the ramp access to the crypt is an excellent addition.

We have one concern: the electricity substation, as currently shown on the drawings, will be visually quite intrusive because it is close to the pavement that surrounds the site. We gather that the applicant is hoping to eliminate this problem, perhaps by moving the substation indoors.
